

한글 해석을 읽고 문맥에 맞도록 문장을 완성하시오. [26년 고3 5월 영어모의고사 37번]¹⁾

(1) 시각이 안전하게 운전하는 데 중요하다는 믿음은 시각적 능력과 관련된 수치들이 대부분의 국가에서 운전면허를 발급하기 위한 시험의 필수적인 부분인 이유이다.

countries / measurements / capability / an / visual / most / of / the / a / the / that / of / belief / driving / is / The / important / test / why / to / safely / driving / integral / for / reason / part / issuing / are / vision / in / is / licence

(2) 이러한 필요 조건들에도 불구하고 시각적 예리함과 같은 단순한 시각적 기능과 운전자의 사고 기록 사이의 관련성을 찾으려는 시도들은 대부분 헛되다고 입증되어 왔다.

visual / such / link / sharpness / drivers / visual / simple / attempts / Despite / as / a / between / proved / functions / have / record / fruitless / find / to / and / these / the / of / requirements, / accident / largely

(3) 이는 더 안 좋은 시각적 능력을 가진 운전자들이 자신의 능력들을 인식하고 그것들 내에서 운전하기 때문일지도 모른다.

may / drive / and / because / of / worse / This / capabilities / aware / drivers / visual / within / are / their / them / with / be / abilities

(4) 또 다른 가능성으로는, 측정되는 시각적 능력들이 지나치게 단순하다는 점일 수도 있다.

are / that / it / capabilities / too / may / Alternatively, / be / visual / the / simple / measured

(5) 사실 운전자의 과업은 시각적 요소들과 인지적 요소들 둘 다를 수반하는 복잡한 것이다.

factors / task / fact / a / is / cognitive / the / involving / is / complex / and / drivers' / one, / both / visual / The

(6) 매우 제한된 시간 내에 운전자는 전방의 도로에서 어떤 일이 일어날 것 같은지를 판단해야 한다.

happen / Within / time, / a / interpret / the / driver / what / has / the / very / to / is / road / ahead / on / limited / likely / to

(7) 이것을 하기 위해 운전자는 다른 운전자들의 행동과 살펴보아야 할 적절한 위치가 어디인지에 대한 일련의 예상들을 발달시켜 왔다.

behaviour / what / driver / has / this, / of / of / drivers' / examine / of / a / are / locations / expectations / do / and / To / appropriate / the / the / developed / to / series / other

(8) 운전자는 다른 정도의 가시성과 두드러짐을 가진 대상들과 마주하게 될 것이며 시각 체계에 항상 잘 들어맞는 것은 아닌 판단들을 내려야 할 것이다.

different / make / visual / judgements / noticeability / is / system / of / of / be / which / suited / faced / have / well / the / objects / with / and / will / The / for / always / not / to / driver / visibility / degrees / and / will

-
- 1) (1) The belief that vision is important to driving safely is the reason why measurements of visual capability are an integral part of the test for issuing a driving licence in most countries.
 - (2) Despite these requirements, attempts to find a link between simple visual functions such as visual sharpness and the accident record of drivers have proved largely fruitless.
 - (3) This may be because drivers with worse visual capabilities are aware of their abilities and drive within them.
 - (4) Alternatively, it may be that the visual capabilities measured are too simple.
 - (5) The fact is the drivers' task is a complex one, involving both visual and cognitive factors.
 - (6) Within a very limited time, the driver has to interpret what is likely to happen on the road ahead.
 - (7) To do this, the driver has developed a series of expectations of other drivers' behaviour and of what are the appropriate locations to examine.
 - (8) The driver will be faced with objects of different degrees of visibility and noticeability and will have to make judgements for which the visual system is not always well suited.
