Dear Organizing Committee,

As the head coach of Banpool Football Club, I am writing in connection with an issue that occurred in yesterday's match between our team and Firestone Football Club.

During the match, a player named Karl Bellinger participated, and it has come to our attention that Bellinger is also the captain of Ironfield Football Club, a team that has already been eliminated from this competition.

Firestone Football Club has clearly violated competition rules by using a player registered with another club.

We urge the committee to investigate this matter.

I am (1) _____ that (2) _____ actions may undermine the integrity of the competition.

I look forward to your response regarding this matter.

Sincerely, Steven Richardson

Paul was standing in the train station. This was (1) _____.

His long - awaited holiday had just begun.

The (2) _____, silver train was already there, and as he boarded, he felt (3) _____ with anticipation.

He found his seat and it was (4) _____ — a window seat with a (5) _____ view.

A moment later, the train began to move.

Paul leaned back in his seat and smiled, looking forward to the journey ahead.

About twenty minutes later, a man in a uniform walked toward him checking tickets.

" Tickets, please, " said the man.

Paul reached into his pocket.

His ticket was n't there.

He searched his jacket, then his backpack. Nothing!

" I'm (6) _____. I know I bought the ticket, but I ca n't find it now, " said Paul, pulling his shaking hands out of the backpack.

" I am (7) _____, sir. I'm (8) _____ you'll have to get off at the (9) _____ station, " replied the man.

Paul's heart raced, and his hands grew sweaty.

He had no idea what to do.

20번

Giving kids an (1) _____ treat that you know they love after a (2) _____ day to cheer them up or soothe them can be (3) _____ but I advise you not to.

When we try to comfort a child with food rather than attend to their (4) _____ and (5) _____ needs, we leave them feeling not understood.

Instead of learning that they'll receive (6) _____ comfort and attention, they receive the message that their needs ca n't or wo n't be met appropriately.

Consequently, they understand one of the following : that their needs are not (7) _____ ; that they are too (8) _____ for their parent ; that they are being (9) _____ ; that (10) _____ time they should keep (11) _____ ; or that they need to shout louder to be heard.

If, after tending to your child's (12) _____ and (13) _____ wounds you want to offer some chocolate, ice cream or a trip to a (14) _____ - food restaurant, that is, of course completely (15) _____ — but it must not replace the nurture.

21번

A scientist named Speiser suspects that scallop vision works in a very (1) _____ way than ours.

Our brains combine the overlapping information from our two eyes into a (2) _____ scene.

A scallop could do the (3) _____ across a hundred eyes, but that seems (4) _____ given how (5) _____ its brain is.

Instead, each eye might simply tell the brain whether it has detected something moving or not.

Think of the scallop's brain as a security guard watching a bank of a hundred monitors, each connected to a motion - sensing camera.

The cameras may be state - of - the - art, but the images they capture are not sent to the guard.

All the guard sees on the monitors is a warning light for every camera that has spotted something.

If Speiser is (6) _____ about this (7) _____ setup, it means that even though each (8) _____ scallop eye has (9) _____ (10) _____ resolution, the animal itself might not have (11) _____ vision.

It knows when eyes in a (12) _____ region of its body have detected something, but it has no (13) _____ image of that object.

It does n't experience a movie in its head the (14) _____ way we do.

It sees without scenes.

22번

In some sense, cities generate themselves — they are (1) _____, (2) _____, self - organizing systems.

Of course, it is actually people who create cities, either individually or as organized into businesses, governments, and (3) _____ institutions.

But, for the (4) _____ part, they do so unintentionally as they go about their (5) _____ lives.

They move to satisfy (6) _____ needs — drop the children off at school, get to work, find a location for a (7) _____ branch office, build a house to live in.

They do not intend to build a city ; that just happens.

Even though, along the way, there are (8) _____ acts of planning, these tend to be (9) _____, (10) _____, or (11) _____.

So, ultimately, a city emerges as the (12) _____ result of (13) _____ (14) _____ events, (15) _____ of which are not intended to be city building.

But the acts of planning are intended to guide the development of the city, and these, to be (16) _____, must rely on an understanding of the processes by which the city generates itself.

23번

The gene - (1) _____ view separates the organism from its environment, and in (2) _____ part, removes agency from the organism.

The ' environment ' becomes a box within which ' gene - motivated ' organisms behave.

Thus, it misleadingly partitions ' (3) _____ ' from ' (4) _____ ' causes, giving primacy to the (5) _____.

Therefore, altruism is denied because ' in reality ' organisms behave to enhance their genes in the ' gene pool ' — and love, hate, desires and (6) _____ motivations flow through and from genes.

With this there can be no creativity.

The organism is a prisoner of its genes.

This is evidently (7) _____ because, if there is a prisoner, it must be the genes, locked in the organism and obeying its will.

It is the organism as a self - organising entity that has motivation and uses genes in its capacity to act.

The word 'organism' has its origins in defining organisms as self - organising beings, going back at (8) _____ to Immanuel Kant's 1790 Critique of Judgement.

The gene - (9) _____ view strips the organism of its (10) _____ self.

24번

There are (1) _____ differences between our attention to animals and our attention to plants, and these are deeply embedded in our (2) _____ systems.

One study used a core tool from (3) _____ cognition studies called " (4) _____ blink. "

" Blink " is when the focus that is given to one object slows down our ability to engage with a (5) _____ object.

Our (6) _____ processing power is a (7) _____ resource, so the (8) _____ attention the (9) _____ object takes up, the (10) _____ we are to shift on to the (11) _____.

In this study, one group of people were first shown an animal and another group were first shown a plant.

A (12) _____ object, a water droplet, followed in (13) _____ succession.

Those looking at an animal initially were much less (14) _____ to see the water than those (15) _____ looking at a plant.

The plant simply took up (16) _____ of their attention, freeing up capacity to notice (17) _____ things.

Plants are not only thought of as (18) _____ (19) _____, they are fundamentally given (20) _____ processing power in our (21) _____ system, becoming a mass of (22) _____, unmoving background greenery.

25번

The chart above shows the (1) _____ amount of on - demand streams of the Top 100 K - Pop Artists, comparing the figures for 2022 and 2023 across six selected countries.

In both 2022 and 2023, Japan recorded the (2) _____ amount of streams, followed by the United States.

The United States and Indonesia recorded (3) _____ increases in the (4) _____ amount of streams from 2022 to 2023, each achieving an (5) _____ 2.6 billion streams.

Indonesia ranked fourth in the (6) _____ amount of streams among the selected countries in 2022 but moved up to (7) _____ place in 2023, surpassing South Korea.

The (8) _____ amount of streams in South Korea reached 7.3 billion in 2023, which was (9) _____ than twice that of the Philippines in the (10) _____ year.

Among the selected countries, Mexico was the (11) _____ country that did not reach 3 billion in the (12) _____ amount of streams in 2022, but it exceeded 3 billion in 2023.

26번

Alan Seeger, an (1) _____ poet, was born in New York City in 1888 and grew up in a (2) _____ home.

After his father's trading business went (3) _____, his family moved to Mexico City for two years.

Its landscape influenced (4) _____ of his works.

Seeger returned to the States and later graduated from Harvard University, where he was inspired by the (5) _____ poets.

Seeger left for Paris, France to live out his (6) _____ notion of (7) _____ life and made friendships with (8) _____ artists.

When World War I broke out in 1914, he joined the (9) _____ army as a volunteer to defend his (10) _____ France.

During the war, he wrote a poem, I Have a Rendezvous with Death, about a soldier accepting his (11) _____ death and it made Seeger instantly (12) _____ when it was published.

Seeger died during the Battle of the Somme in 1916.

Following his death, the (13) _____ Military awarded him the Croix de Guerre, the (14) _____ (15) _____ (16) _____ honor.

27번

< 2026 Space Exploration Exhibition >

Join us at the Ashmont Science Museum for an (1) _____ journey into the cosmos!

We offer hands - on experiences for space enthusiasts of all ages.

When & Where

— May 16th-31st, from 10 a.m. to 5 p.m.

— Kepler Hall on the (2) _____ Floor

Exhibition Tickets

— Adult (15 & over): \$ 15

— Child (14 & under): \$ 10

※ Exhibition tickets allow access to all areas of the museum.

Activities

1) touching (3) _____ (4) _____ rock

2) playing astronaut games in space suits

3) taking photos in front of spacecraft models

Notes

— Volunteers will be on site to answer questions.

— The (5) _____ 100 visitors will receive a space - themed pen as a souvenir each day.

For (6) _____ information, please visit www.ashmontsm.org.

< Barkfield Pawlish Grooming Studio >

Is your dog in need of a (1) _____ touch? Visit us!

Your dog will leave looking and feeling their (2) _____!

Opening Hours

• Monday - Saturday : 9 a.m. - 5 p.m. • Sunday : Closed

Services & Pricing

• Hair Cut : \$ 50 • Bath & Brush : \$ 30 • Nail Clipping : \$ 20 • Ear Cleaning : \$ 10

※ (3) _____ charges may apply depending on your dog's size or hair type.

Notes

• Inform us if your dog has any (4) _____ conditions.

• We provide dog snacks, but you are (5) _____ to bring your dog's (6) _____ snacks.

Reservations should be made (7) _____ (www.barkfield.com) at least one day before your visit.

29번

A study by Eurofound found that (1) _____ people who were working remotely reported (2) _____ difficulties in managing their workload than (3) _____ colleagues.

Moreover, (4) _____ (5) _____ people began their careers working remotely during the (6) _____, unlike those in (7) _____ generations who had (8) _____ years to establish (9) _____ connections and embed themselves in the (10) _____ culture in an in - person job.

A survey by Prospects found that almost half of students and graduates in the United Kingdom found it (11) _____ to work from home during the (12) _____ (13) _____ to a lack of (14) _____ workspace or distractions.

While (15) _____ people may struggle (16) _____ - term with (17) _____ work, perhaps (18) _____ of a (19) _____ model where they can work from home part of the time and work (20) _____ (21) _____ times, would work well for them.

But it may not be that they need a (22) _____ (23) _____ structure with (24) _____ days of the week designated for working remotely but instead a (25) _____ option that allows them, if (26) _____, depending on the job role, to choose their day - to - day work location.

30번

In humans, the infant (1) _____ system is less (2) _____ than that of adults, enabling a (3) _____ range of bacteria to establish in our guts.

Similarly, (4) _____ plants release (5) _____ (6) _____ compounds into the soil than (7) _____ ones, allowing a (8) _____ variety of microbes to colonize their rhizospheres.

(9) _____ breast milk contains sugars.

At first, scientists struggled to understand why mothers express these compounds, as babies ca n't digest them.

It now seems that their (10) _____ purpose is to feed the bacteria with which the child will grow.

They selectively cultivate a (11) _____ (12) _____ species with a (13) _____ role in helping the gut to develop and fine - tuning the (14) _____ system.

Similarly, (15) _____ plants release (16) _____ quantities of sugars into the soil, to feed and develop their (17) _____ microbiomes.

Like the (18) _____ gut, the (19) _____ not only digests food, but also helps to protect plants from disease.

Just as the bacteria that live in our guts (20) _____ and attack invading pathogens, the microbes in the (21) _____ create a (22) _____ ring around the root.

Plants feed (23) _____ bacteria species, so that they eliminate (24) _____ microbes.

31번

Orb - weaving spiders often use (1) _____ (2) _____ signals to defend their webs.

When a (3) _____ approaches, the resident spider will rapidly shake its web, sending out a series of (4) _____ vibrations.

These vibrations can be interpreted as a challenge, signaling the resident spider's readiness to fight.

The intensity and complexity of these signals often correlate with the size and strength of the spider, allowing the invader to assess the risk of engaging in a (5) _____ confrontation.

The beauty of (6) _____ signaling lies in its efficiency.

It avoids (7) _____ (8) _____ clashes, allowing spiders to resolve (9) _____ disputes with (10) _____ risk of injury.

A (11) _____ or (12) _____ spider, upon receiving a (13) _____ (14) _____ warning, may choose to retreat and seek a less (15) _____ territory, rather than risk a potentially (16) _____ fight.

This makes (17) _____ communication a (18) _____ tool for maintaining stability and reducing aggression within spider populations.

32번

According to (1) _____ economist Lionel Robbins, whether goods and services are (2) _____ to (3) _____

welfare or not, economics should study them if they satisfy the wants of some men.

It is also (4) _____ noting that in view of Robbins, economics does not deal with the question as to what ends should be achieved, that is, what wants should be (5) _____ and what not, because in this regard man himself has to decide.

Economics itself does not make a choice.

Economist only tells in what ways the given ends or wants can be achieved with the (6) _____ (7) _____ resources.

What ends or wants should be selected for satisfaction is not the concern of economists.

Whether the ends chosen by man are (8) _____ or (9) _____, (10) _____ or (11) _____, economics should study them, because the task of economist is not to praise or criticise but only to analyse and explain.

To decide about the desirability or otherwise of a thing is beyond the scope of economics.

Therefore, according to Robbins, economics is (12) _____ between ends.

33번

In some parts of India there are temples to Sitala, who is a goddess of skin diseases.

Historically, people in these regions made offerings to Sitala in order to protect themselves against smallpox.

During the (1) _____ period in India, the British introduced the smallpox vaccine, which ultimately led to the elimination of smallpox.

This in turn led to a (2) _____ decline in the worship of Sitala as people no longer needed her assistance to avoid smallpox.

Was it (3) _____ for the British to introduce the smallpox vaccine given that it undermined the (4) _____ practice of making offerings to Sitala?

Or was this (5) _____ imperialism?

Should the British simply have lived and let live, or lived and let die as the case may be?

That might seem (6) _____, but there are some scholars who argue for that.

What is beyond dispute is that no matter how you answer that question, you are making a value judgment.

In this example, choosing to live and let live is n't value - (7) _____ ; it's a choice that values (8) _____ autonomy over the lives of those who would otherwise be saved.

34번

What are the relations between (1) _____ determinations and (2) _____ (3) _____ experience?

If every author comes out with his / her (4) _____ set of values and (5) _____ history, how is this (6) _____ vision of the world influenced by the society in which the author lives?

The (7) _____ world of the writer necessarily meets the (8) _____ world outside of him or her.

Pierre Bourdieu, in La distinction, tries to answer this question from a (9) _____ point of view, saying that the analysis of this kind of relation between the (10) _____ and the (11) _____ world must go back to the (12) _____ stage of a child's life when s / he experiences pleasure and aversion.

But children are already part of a (13) _____ group thanks to their family, and therefore the pleasure and the aversion they experience are class - (14) _____, according to the volume of capital they can access, so that the' (15) _____' pleasures, Bourdieu affirms, are rooted in these socially conditioned experiences.

In (16) _____ words, for Bourdieu, from the beginning of life, every experience is already conditioned by the world outside, and this influence manifests itself in (17) _____ works too.

35번

Pre (1) _____ (2) _____ Waste is " waste " that is generated by the (3) _____ processes used to make the products or packaging that we buy as consumers.

This is manufacturing " waste " and is typically very (4) _____, of (5) _____ quality and comprises only a (6) _____ material.

Examples are : offcuts from making aluminium cans ; cardboard boxes or clothing ; trimmings from preparing vegetables ; or wood or textile offcuts from making furniture.

(7) _____ " waste " was in the past often sent for disposal, but increasingly producers are recycling their (8) _____ " waste " to save money by turning (9) _____ trimmings or offcuts back into (10) _____ (11) _____ materials.

To send (12) _____ materials for disposal is not only (13) _____ (14) _____ practice by the producer, from an (15) _____ perspective it is (16) _____.

These are (17) _____ - quality, (18) _____ and easily (19) _____ materials that just happen to be in the (20) _____ form ; so recycle or recover them!

36번

The autonomy granted to the (1) _____ in terms of (2) _____ speech can be both (3) _____ (understood purely from the speaker's point of view) and relational in nature.

The individual's speech must be protected in order to allow them to freely develop their personality.

This is (4) _____, even bearing in mind that this development is only (5) _____ in (6) _____ life, which means in relation to and possibly in cooperation with others.

(7) _____ autonomy, however, also takes the interests of the audience of the speech into account.

Speech can also limit the autonomy of others, for example in the case of defamation, invasion of privacy, or hate speech that hurts (8) _____ community.

(9) _____ (10) _____ systems also take the (11) _____ aspect into account when setting the limits of freedom of expression.

They restrict freedom of expression in the interests of the autonomy of those affected by the speech, in order to ensure the peace and security of (12) _____ coexistence.

37번

The belief that vision is (1) _____ to driving safely is the reason why measurements of (2) _____ capability are an (3) _____ part of the test for issuing a driving licence in (4) _____ countries.

Despite these requirements, attempts to find a link between (5) _____ (6) _____ functions (7) _____ as (8) _____ sharpness and the accident record of drivers have proved largely (9) _____.

This may be because drivers with (10) _____ (11) _____ capabilities are (12) _____ of their abilities and drive within them.

Alternatively, it may be that the (13) _____ capabilities measured are too (14) _____.

The fact is the drivers' task is a (15) _____ one, involving both (16) _____ and (17) _____ factors.

Within a very (18) _____ time, the driver has to interpret what is (19) _____ to happen on the road ahead.

To do this, the driver has developed a series of expectations of (20) _____ drivers' behaviour and of what are the (21) _____ locations to examine.

The driver will be faced with objects of (22) _____ degrees of visibility and noticeability and will have to make judgements for which the (23) _____ system is not always well suited.

38번

Mathematics can be considered a (1) _____ language, but (2) _____ of it is explicitly taught. However, it is suggested that some aspects of (3) _____ knowledge could be (4) _____ and (5) _____ from birth : for example, the ability to discern between (6) _____ quantities (i.e. (7) _____ versus (8) _____), while understanding of the relationships and associations between numbers are predominantly learnt. Although mathematics can be considered a (9) _____ language, there are (10) _____ language and (11) _____ differences in how counting systems are used. For example, in English, words like 'eleven' and 'twelve' do not directly reflect the values that they stand for, $10 + 1$ and $10 + 2$. However, in Chinese, the number system is very (12) _____, with words that directly reflect the values that are used. For example, the number 20 in Chinese, (13) _____, literally translates as 'two - ten'. But it is not only the (14) _____ representation of numbers that differs ; the counting systems used also differ. Although the (15) _____ system predominates today, (16) _____ counting systems have been developed over time, for example, the (17) _____ (18) _____ system used a base 20 system.

39번

When we practice, we want to strengthen the synapses relaying information on how to play something correctly, while weakening those that send (1) _____ messages. To understand how this works, think of a (2) _____ hose that has (3) _____ holes in it. Some of the water will go through the hose and out the nozzle, but a lot of it will leak out the holes. This is what your brain is like when you first start to learn something : the water running out the holes is all the (4) _____ information your brain is sending to your fingers, lips, etc. Once you plug the holes in the hose, all the water goes then out the nozzle ; in your brain, this is (5) _____ to the synapses relaying the (6) _____ messages being much (7) _____ than those sending (8) _____ messages. The brain accomplishes this through changing the structure of the synapse to make it (9) _____ for the (10) _____ neurons to communicate. A (11) _____ phrase in neuroscience is "neurons that fire together wire together," meaning neurons that communicate with each (12) _____ often change their structure to make that communication (13) _____.

40번

New York University's Leif D. Nelson and Tom Meyvis explored a (1) _____ phenomenon in a 2008 study. The researchers recruited participants who were told they would be reviewing a massage cushion. Participants were split into two groups. The (2) _____ group used the device for three minutes (180 seconds) without a break. The (3) _____ group used the massage cushion for two periods of 80 seconds, with a 20 - (4) _____ break between sessions. Afterwards, participants were asked to rate their enjoyment of the massage on a nine - point scale (one = not (5) _____ ; nine = extremely (6) _____). Those who had a three - minute massage gave an (7) _____ rating of 6.05 out of 9. However, those forced to take a 20 - second break during their massage gave a rating of 7.05 — that's a 17 % improvement in satisfaction. At (8) _____ glance, that's (9) _____ (10) _____ (11) _____. The group who had the (12) _____ massage enjoyed it more. But the theory is that the break in pleasure prevents us from becoming too (13) _____ with the (14) _____

experience and thus noticing it less — a process called habituation.

41~42번

Flashback to 50,000 years ago on the Serengeti, and you are dragging an antelope back to the village.

Let us just say it has cost you, metabolically speaking, 2,000 calories to stalk, chase and bring down the antelope.

When you get back to the village, you would clearly have to consume at least 2,000 calories to recover your expenditure.

But there is no guarantee that you would successfully get an antelope the (1) _____ time out, so if you ONLY ate to your metabolic need, you would n't survive very long.

That is when the (2) _____ part of the brain, which governs the feeling of reward kicks in, driving you to eat (3) _____.

But how do you get past the (4) _____ difficulty of a stomach packed (5) _____ with 2,000 calories of meat? Your brain becomes more (6) _____, it begins to desire foods that are more calorically (7) _____ and more calorically (8) _____, which are going to be foods (9) _____ in (10) _____ sugars and (11) _____.

What foods are (12) _____ in (13) _____ sugars and (14) _____? Desserts.

Your dessert stomach is an (15) _____ leftover from your days in the Serengeti, to make (16) _____ that even when (17) _____, you were still desiring the (18) _____ types of foods to ensure you were (19) _____ to maximize your caloric intake at every meal, because there was never a guarantee of when the (20) _____ meal would arrive.

It kept us (21) _____ in (22) _____ feast - famine cycles, but has become (23) _____ for (24) _____ of us in the feast - feast environment of today.

43~45번

Matthew loved tennis. He had been practicing hard for weeks, preparing for the (1) _____ match of the year.

Today was the day. He wanted to win. He had trained so much.

His (2) _____ friend and training partner Larry was on the sidelines, cheering him on.

The match started off great.

He ran across the court, hitting each ball with speed and precision.

But then, SNAP! His racket strings broke!

Matthew froze and his heart pounded as he stared at the (3) _____ strings hanging from his racket.

He had never had a string break during a match before, and now it had happened in his most (4) _____ match.

The referee called for a (5) _____ break while Matthew figured out what to do.

He was (6) _____ to give up when he heard a voice.

" Use my spare! " He turned to see Larry holding out his (7) _____ racket.

Matthew hesitated. It was n't his racket. It would n't feel the (8) _____.

But then he remembered something his coach always said, " Champions never give up. "

Taking a (9) _____ breath, he grabbed Larry's racket and returned to the court.

The (10) _____ racket was (11) _____ than his (12) _____, and the grip was n't as (13) _____.

He missed an (14) _____ ball, and his opponent scored a point.

But instead of getting upset, Matthew told himself, ' It's (15) _____. I just need to adapt.'

He focused on his footwork and adjusted his grip.

Despite his (16) _____ efforts, things did n't go as Matthew hoped.

And by the end of the match, he had lost.

He had wanted to win so badly.

As Matthew walked miserably to the net, he looked at his opponent.

The boy was smiling, holding out his hand.

He did n't want to admit his defeat.

But then, he remembered something Larry always said :

" Winning is n't about the score. It's about how you play the game. "

Matthew realized he had done his (17) _____.

Matthew smiled, shook the boy's hand and said, " Congratulations. You played a (18) _____ game. "
